

AEROTONE

USER MANUAL

SoFly

INTRODUCTION

Authentic sound for your whole fleet, crafted for endless immersion.

Thank you for choosing to install AeroTone for Microsoft Flight Simulator 2020 / 2024.

Every aircraft in your hangar (past, present and future) benefits from a richer, more convincing audio landscape that brings you closer to real-world aviation.

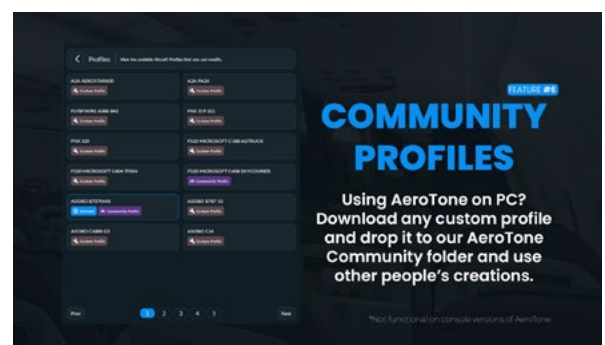

Experience authentic sound design built from hundreds of professionally produced recordings that cover a wide range of aircraft types and flight conditions.

AeroTone is fully customisable. The custom in-sim control panel allows you to adjust volume levels, toggle individual sound elements, or completely disable entire sound categories with a single click.

You'll also never feel alone in the sky. AeroTone includes over 100 hours of pre-recorded ATC chatter that adapts to your current location. Regional audio spans the UK, US, Europe, Asia, and more. Included is also oceanic radio ATC provides long-haul immersion across transatlantic and transpacific flights.

This manual will guide you through everything you need to know about the product and how you can make the most of your new audio companion.

If you ever have any questions, please reach out to us at our support portal.

CONTENTS

Getting Started

- 05 Installation
- 06 Navigating the Panel
- 07 Sound Options
- 08 Aircraft Profile Management
- 09 Creating and Sharing Community Profiles
- 10 ATC Options
- 11 Credits and EULA

IMPORTANT

Your screen must have a minimum resolution of 1280px x 720px in order for the panel to display correctly. No refunds or support will be given if you do not meet these requirements.

Need Help or Support?

 [Visit our Support Portal](#)

We know that sometimes you just need a bit of help. If something isn't quite right or you need a bit of guidance, contact our customer support team and we'll work to support you as best as we can. Either click on the box above or head to sofly.io/support

INSTALLATION

Regardless of where you purchase AeroTone, you will need to add it to your Microsoft Flight Simulator 'community' folder.

This will vary depending on whether you use MSFS 2020 or 2024.

Most stores have their own installer within their app (e.g. iniBuilds), which will automatically detect your Community folder and install correctly.

If you are installing manually, there are tools available to detect your Community folder for MSFS 2020 and 2024. SoFly recommends Simstaller by Parallel 42:

<https://parallel42.com/products/simstaller>

Once installed, you can then load up your simulator and start a flight.

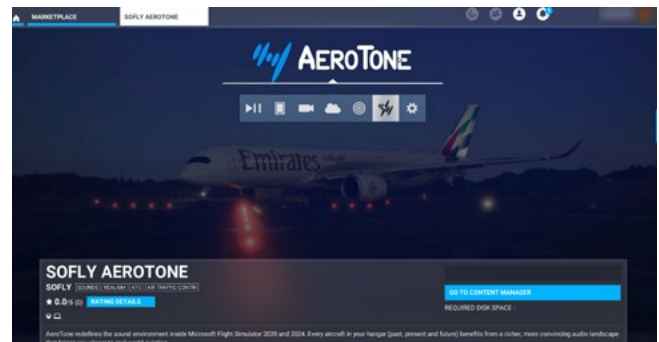

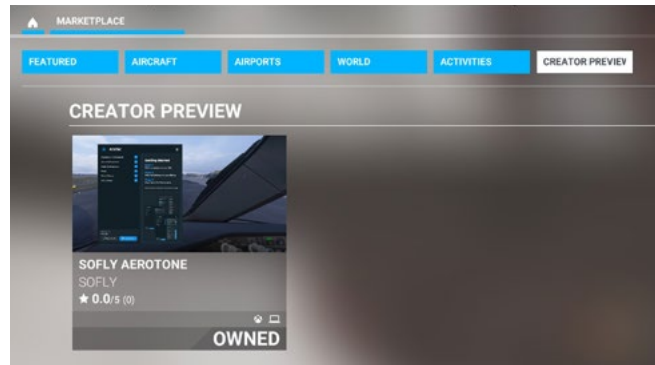

INSTALLATION (MSFS MARKETPLACE)

Search for the product, click on 'Install' and AeroTone will automatically be installed into your flight sim.

Once installed, you can then load up your simulator and start a flight.

IMPORTANT NOTICE

You must ensure that the simulator is not running prior to the installation of AeroTone (excluding the in-sim Marketplace installation)

WATCH THE VIDEO TUTORIAL

Scan the QR code to load our video tutorial to understand AeroTone.

NAVIGATING THE PANEL

The AeroTone panel is the heart and soul of the product. From the panel, you are in complete control of every option and sound effect. In this section, we will walk you through each page and the available options for you.

LOADING THE PANEL

Once you have loaded a flight, from the in-sim toolbar, locate the AeroTone icon and select it. This will then load the panel.

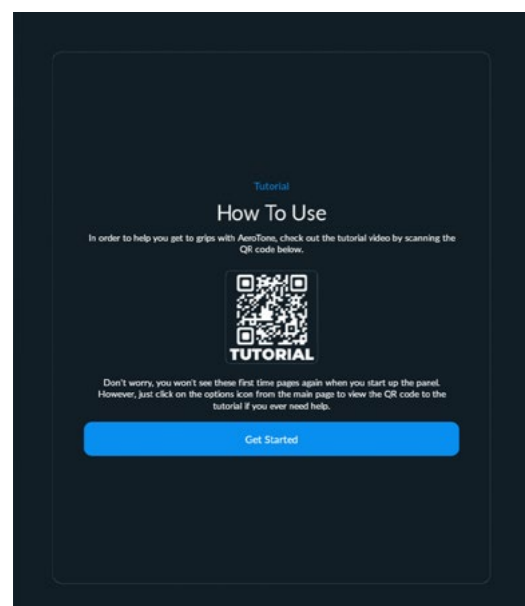

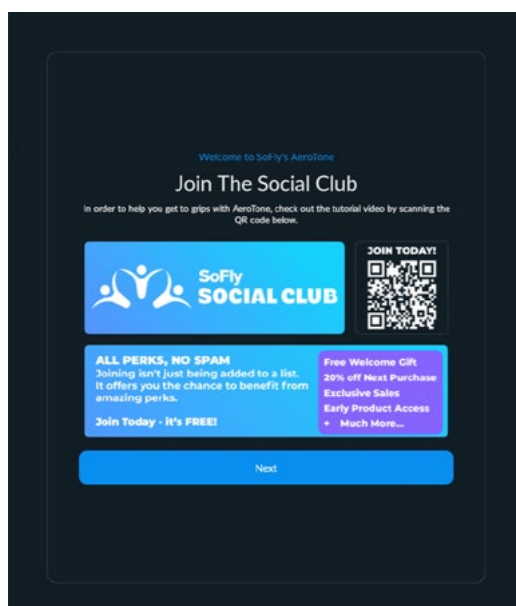

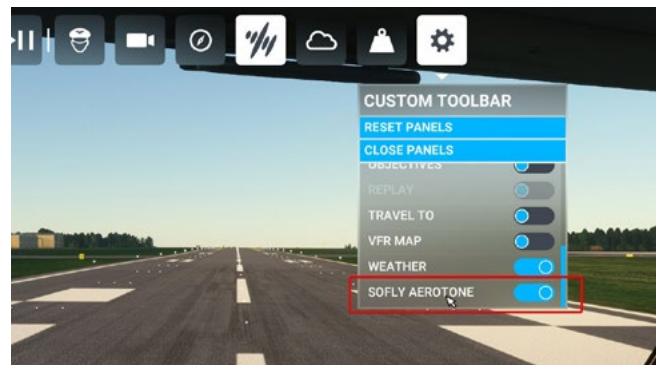

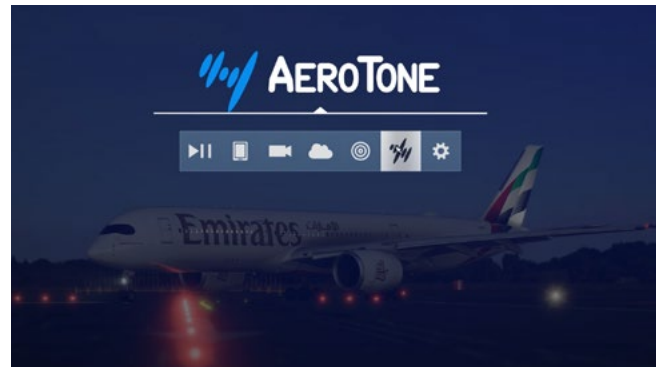

If you don't see it, click the 'cog' icon and ensure it's selected.

FIRST TIME

On first use, you'll be greeted with a welcome screen and an invitation to join the SoFly Social Club, which offers year-round discounts and extra perks.

The second screen contains this tutorial video. Once ready, select Get Started to open AeroTone's main interface.

You won't see these screens again following your first time usage.

MAIN INTERFACE

This is where your customisation begins. On the left, you'll see categories such as:

- Flightdeck Environment
- Aircraft Movement
- Cabin Environment
- Pilots
- Wind Effects
- ATC Chatter

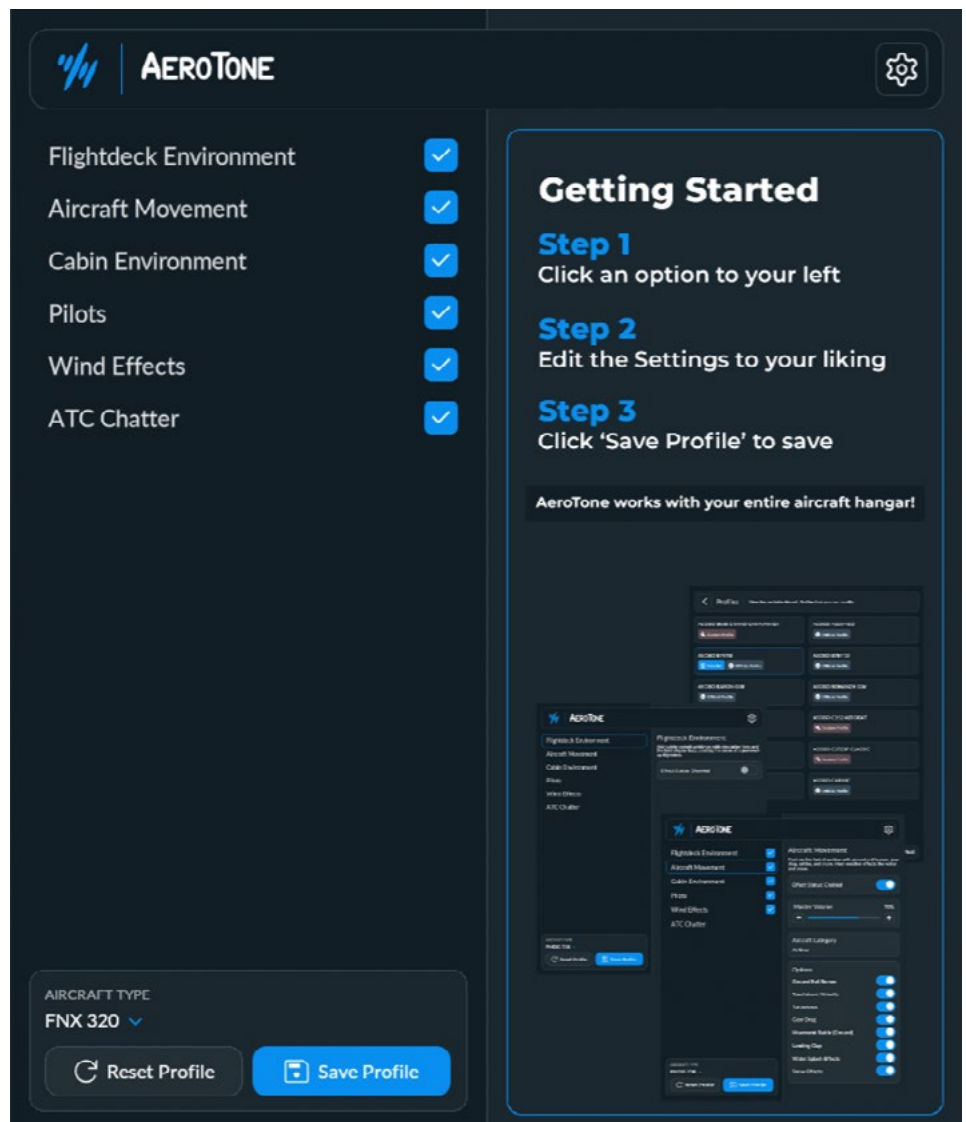

Selecting any category opens a submenu where you can toggle it on or off, change volume levels, and adjust specific options. Certain categories, such as Aircraft Movement, include additional subtype settings so AeroTone can more accurately match your currently loaded aircraft.

Changes apply instantly, so you can hear adjustments live while flying.

Any time you edit a profile, AeroTone will display a reminder to save. Once saved, your settings automatically load whenever you use that aircraft — or any aircraft sharing the same profile family, such as the A330 lineup in Microsoft Flight Simulator 2024.

Once set up, AeroTone runs automatically — no need to reopen the panel unless you want to make tweaks.

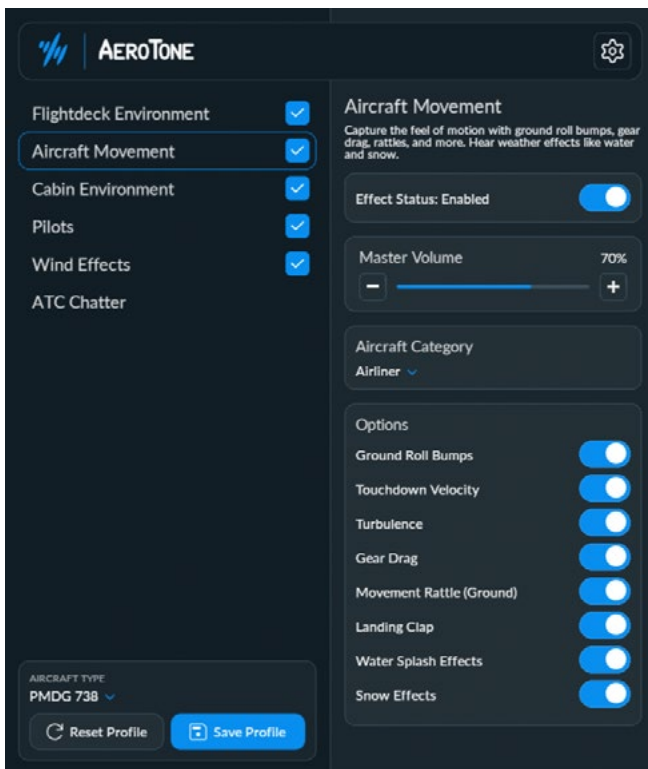

Our panel has been designed for use on PC and consoles, using either mouse or game controller.

EDITING OPTIONS

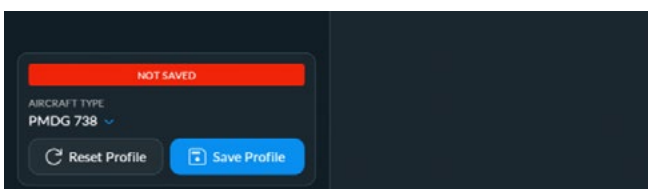

Clicking an option on the left will reveal further options. You can adjust the master switch to enable/disable the sound effect, adjust the volume, and then turn on/off individual sound effects.

In some categories like 'Aircraft Movement', there are further options too to further refine your experience.

Toggling a setting will make the change live in the simulator, but won't persist until you **SAVE PROFILE**.

After you make a change, you will notice a warning box appear, indicating you have unsaved changes.

Click on 'SAVE PROFILE' to make the changes.

THE RESET BUTTON

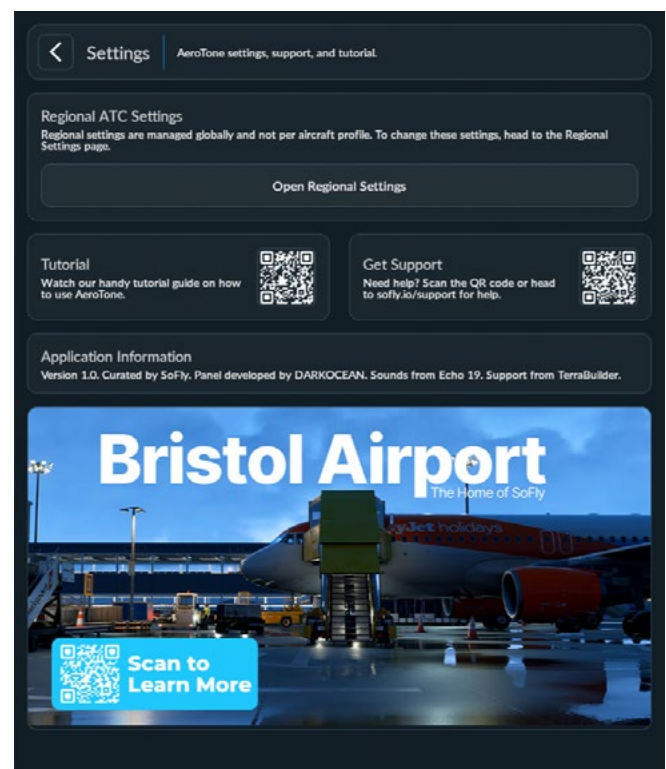

The reset button will simply restore the profile back to its default settings. This could be either from the 'Official' profiles included, a 'Community' profile, or simply reset everything back to OFF.

We will cover profiles later in this manual.

SETTINGS PAGE

Clicking the cog icon in the top-right will bring you to the settings page.

AeroTone is simple in design that it doesn't require too many settings for you to change. Here you will be able to view the tutorial, get support, or see the latest SoFly products available to you.

SOUND OPTIONS

We have collaborated with Echo19 in order to create an authentic sound suite that brings your aircraft to life. Over 80 sound effects from hundreds of sound files have been engineered and sampled to create a more immersive experience.

Every sound effect has dynamic and unique logic along with multiple variations for plenty of realism.

Below is the complete list of the different categories and sound effects.

Flightdeck Environment

- Circulation Fans
- Display buzz

Aircraft Movement

- Ground Roll Bumps
- Touchdown Velocity
- Turbulence
- Gear Drag
- Movement Rattle (Ground)
- Landing Clap
- Water Splash Effects
- Snow Effects

Cabin Environment

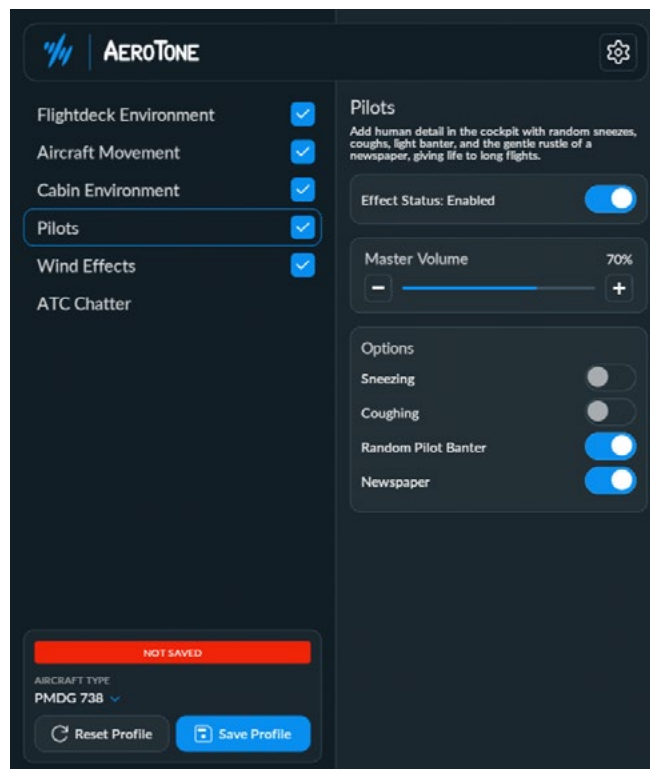

- Galley Noises
- Toilet Flushing
- Passenger Chatting
- Call Bells and Interphone
- Vibrations

Pilots

- Sneezing
- Coughing
- Random Pilot Banter
- Newspaper

Wind Effects

- Flightdeck Wind
- Turbulence

AIRCRAFT PROFILE MANAGEMENT

AeroTone is designed to work with every aircraft and vehicle in your simulator. AeroTone detects the aircraft in your sim, assigns it a profile and allows anyone to customise and share.

Included with every copy of AeroTone is a range of what we call 'Official' profiles. These profiles are from the top 100+ aircraft in the sim (including default) and have pre-assigned values. This allows you to simply load the simulator and fly, whilst hearing the sound effects.

You can customise and save any of the settings from an official profile and then save it as a 'Custom Profile'.

You can then share your custom profile with other users who can download it and save to their 'Community' folder within AeroTone (NOT your MSFS Community folder).

PROFILE TYPES

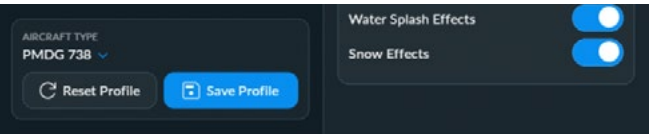

We prioritise loading profiles in the following way:

- 1 - Community Profiles
- 2 - Custom Profiles
- 3 - Official Profiles

Whenever you reset a profile, it will default to the highest in the hierarchy. So if you have a Official Profile but make edits and reset, your settings will default to the Official Profile. Likewise, if you make edits to a 'Community profile', it will load back to the community profile, overriding if you have an official profile with the same name.

AIRCRAFT PROFILE SCREEN

In order to view aircraft profiles, you need to click the 'aircraft' from the main panel menu.

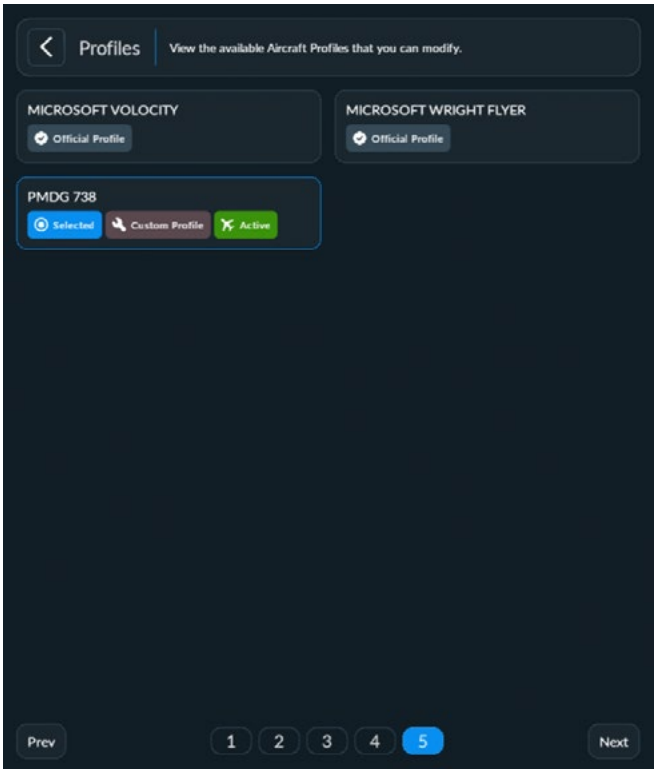

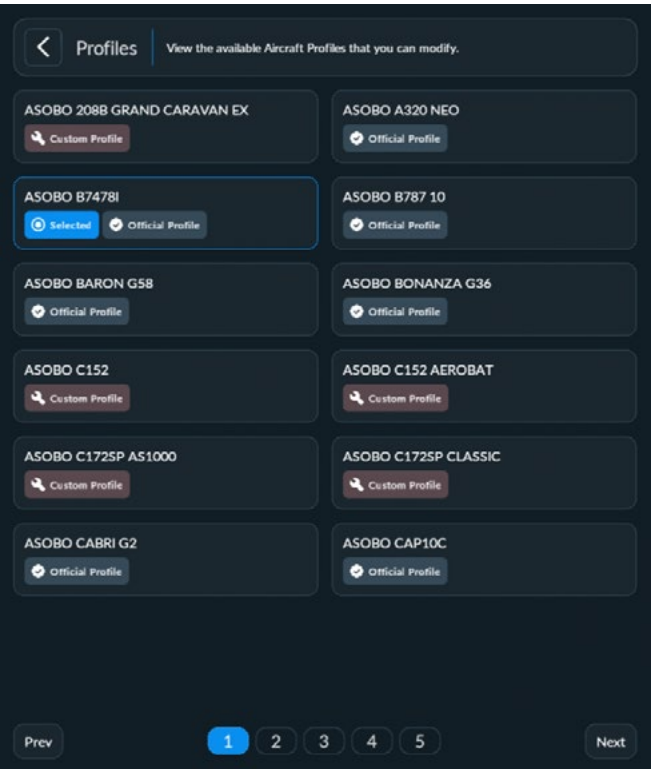

Clicking that will bring up a list of aircraft profiles you have available.

IMPORTANT

Profiles will only populate when you load the plane in your simulator. 100s of official profiles are included, but will only appear in your list if you load the aircraft. This is to prevent overloading the user and only showing you a menu unique to your usage.

Below is an example aircraft profile screen.

UNDERSTANDING THE PROFILES

Each profile has multiple tags associated to it.

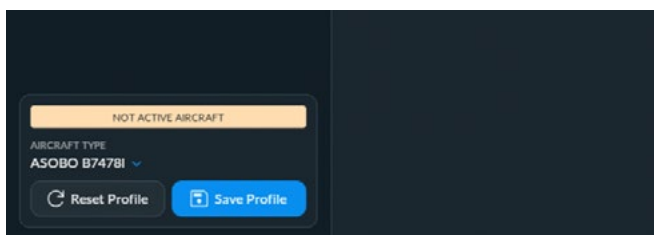

ACTIVE

This is your current ACTIVE aircraft in the simulator. Your current settings on the main page are drawn from this.

SELECTED

This is the current PROFILE loaded in your simulator. These are the AeroTone profile settings you are EDITING from the main panel menu.

Any changes you make with the profile SELECTED will be saved to the SELECTED profile. You can tell if you are not in an ACTIVE aircraft by the warning on the main panel menu, saying "NOT ACTIVE AIRCRAFT".

You then have tags for:

Community Profiles

Custom Profiles

Official Profiles

NOTE:

When editing profiles for SELECTED profiles, you will hear the sound effects applied to that profile, not the loaded aircraft. You must then save. Once you select the ACTIVE aircraft, you will hear the sounds for your loaded plane.

COMMUNITY PROFILES

You are able to share your custom profiles with the community and allow them to download and save to their PC.

NOTE: This feature is only for PC users and not those on console. Console users can create custom profiles or use the official profiles.

STEP 1 - LOCATE YOUR CUSTOM PROFILES

You first need to locate your custom profiles you have created.

MSFS 2020 USERS

You will find your custom profiles in your MSFS 2020 WASM folder located here:

C:\Users\[**USERNAME**]\AppData\Local\Packages\Microsoft.FlightSimulator_8wekyb3d8bbwe\LocalState\packages\sofly-aerotone\work\profiles

MSFS 2024 USERS

You will find your custom profiles in your MSFS 2024 (2020 product) WASM folder located here:

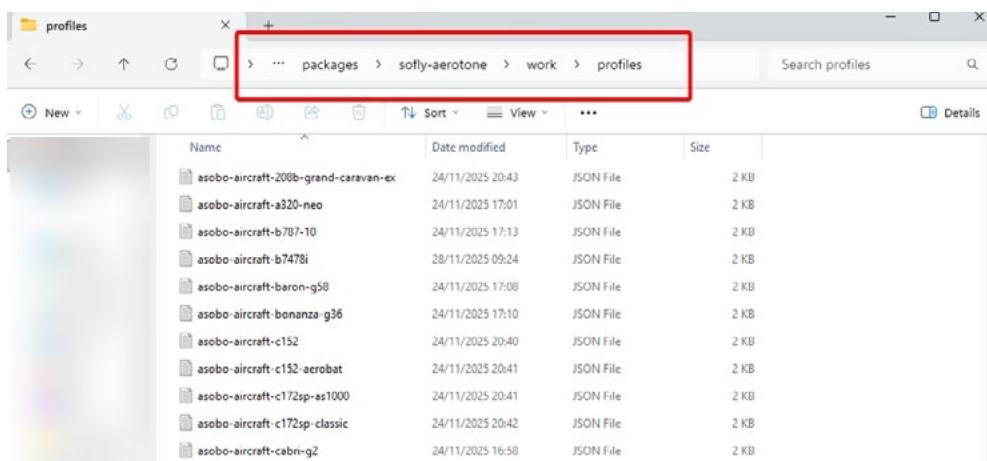

C:\Users\[**USERNAME**]\AppData\Local\Packages\Microsoft.Limitless_8wekyb3d8bbwe\LocalState\WASM\MSFS2020\sofly-aerotone\work\profiles

STEP 2 - SHARING FILES

Inside of these folders, you will have all of your custom profiles.

You just need to share any of these files to any upload service of your choice.

Just remember, any files you share may still be protected by SoFly Copyright and you do not become the sole owner of the files. We may, with or without permission, then use these files to create 'Official' profiles in the future to share with more users. You will be credited.

STEP 3 - ADDING TO THE COMMUNITY FOLDER

IMPORTANT

THIS IS NOT YOUR FLIGHT SIMULATOR COMMUNITY FOLDER.

This is an AeroTone 'Community' folder.

Your simulator must not be running.

Locate the AeroTone 'Community' folder, found inside the work directory you looked for earlier when searching for your custom profiles. Instead of 'profiles' at the end, it is 'community'.

MSFS 2020 USERS

You will find your AeroTone Community Folder in your MSFS 2020 WASM folder located here:

C:\Users\[**USERNAME**]\AppData\Local\Packages\Microsoft.FlightSimulator_8wekyb3d8bbwe\LocalState\packages\sofly-aerotone\work\community

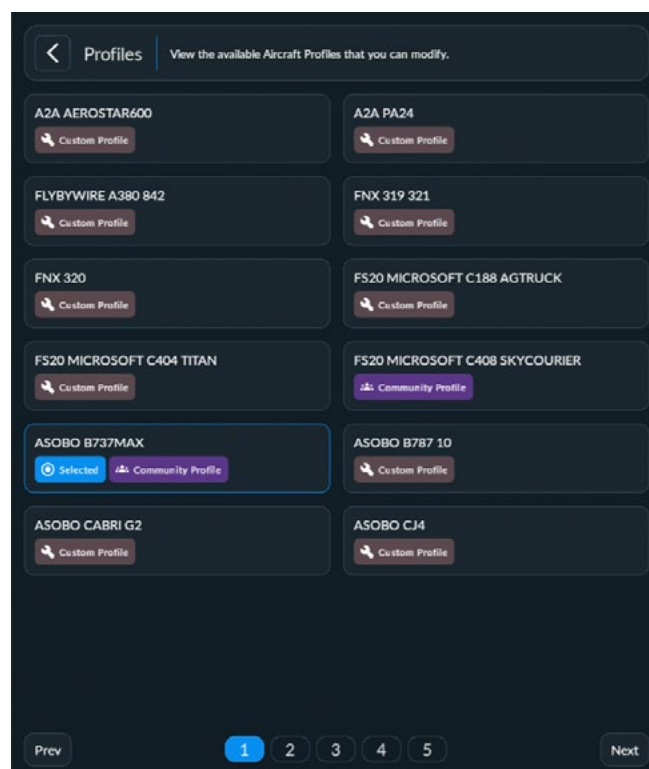

MSFS 2024 USERS

You will find your AeroTone Community Folder in your MSFS 2024 (2020 product) WASM folder located here:

C:\Users\[**USERNAME**]\AppData\Local\Packages\Microsoft.Limitless_8wekyb3d8bbwe\LocalState\WASM\MSFS2020\sofly-aerotone\work\community

Simply drop any AeroTone profiles here.

Load up your simulator again and now you will see Community Profiles in AeroTone's Aircraft Profile screen.

ATC OPTIONS

AeroTone includes over 100 hours of ATC background chatter audio for you to listen to at any flight phase.

We have developed a regional system, meaning you will only hear ATC in applicable areas of the world, enhancing each of your flights to make the skies feel alive.

We also adapt the audio to play distinct ‘Ground’ and ‘Air’ types of ATC chatter depending on your current aircraft position.

ATC chatter works globally, but is completely flight aware for a more authentic feeling.

HOW TO USE

By default, all official profiles have ATC Chatter set to OFF.

However, you can enable it globally by clicking the ATC Chatter tab on the main page and toggling the enable switch to ON.

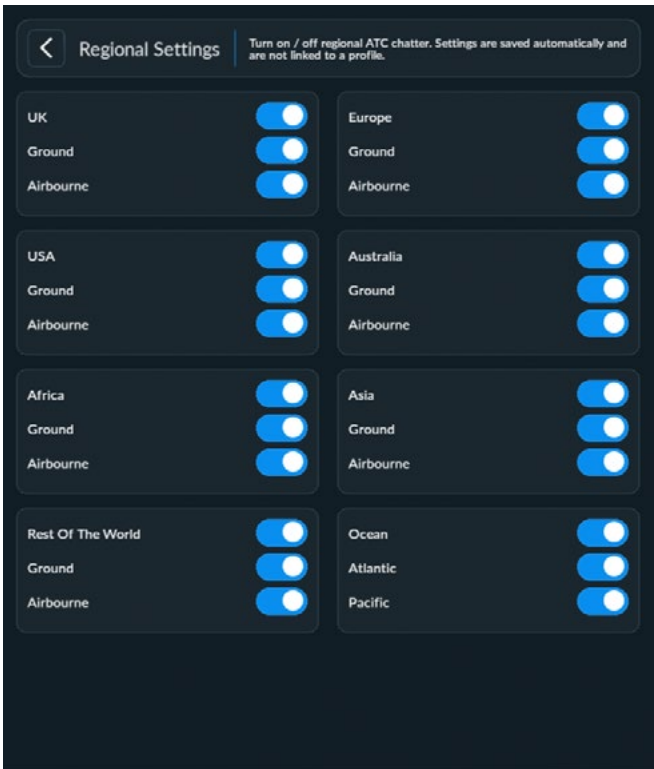

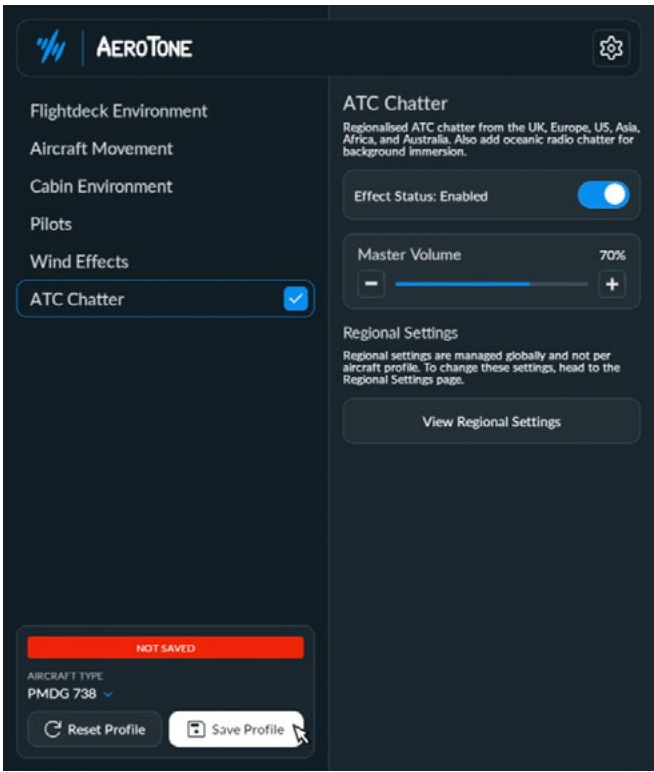

Ensure that you have a volume value set to more than 0.

GRANULAR OPTIONS

You can adjust which regions you hear ATC background chatter. You can choose from the likes of United States, United Kingdom, Europe, and beyond. Equally, you can toggle the Ground or Air specific ATC chatter to your liking. You can also toggle on/off different oceanic ATC recordings.

These options are saved in the REGIONAL OPTIONS, which is also accessible via the SETTINGS PAGE.

Expect more from our ATC background chatter in an upcoming update for AeroTone.

COPYRIGHT AND CREDITS

Thanks to everyone involved.

AeroTone was the result of months of dedication, passion and hard work from talented teams and individuals. AeroTone was worked on by multiple teams in order to bring the best work for the community.

IMPORTANT: PLEASE READ THIS LICENSE CAREFULLY BEFORE USING THIS SOFTWARE.

1. LICENSE

By receiving, opening the file package, and/or using AeroTone ("Software") containing this software, you agree that this End User License Agreement (EULA) is a legally binding and valid contract and agree to be bound by it. You agree to abide by the intellectual property laws and all of the terms and conditions of this Agreement.

Unless you have a different license agreement signed by SoFly Limited your use of AeroTone indicates your acceptance of this license agreement and warranty.

Subject to the terms of this Agreement, SoFly Limited grants to you a limited, non-exclusive, non-transferable license, without right to sub-license, to use AeroTone in accordance with this Agreement and any other written agreement with SoFly Limited. SoFly Limited does not transfer the title of AeroTone to you; the license granted to you is not a sale. This agreement is a binding legal agreement between SoFly Limited and the purchasers or users of AeroTone.

If you do not agree to be bound by this agreement, remove AeroTone v1.00 from your computer now and, if applicable, promptly return to SoFly Limited by mail any copies of AeroTone and related documentation and packaging in your possession.

2. DISTRIBUTION

AeroTone and the license herein granted shall not be copied, shared, distributed, re-sold, offered for re-sale, transferred or sub-licensed in whole or in part except that you may make one copy for archive purposes only. For information about redistribution of AeroTone contact SoFly Limited.

3. USER AGREEMENT

3.1 Use

Your license to use AeroTone is limited to the number of licenses purchased by you. You shall not allow others to use, copy or evaluate copies of AeroTone.

3.2 Use Restrictions

You shall use AeroTone in compliance with all applicable laws and not for any unlawful purpose. Without limiting the foregoing, use, display or distribution of AeroTone together with material that is pornographic, racist, vulgar, obscene, defamatory, libelous, abusive, promoting hatred, discriminating or displaying prejudice based on religion, ethnic heritage, race, sexual orientation or age is strictly prohibited.

Each licensed copy of AeroTone may be used on one single computer location by one user. Use of AeroTone means that you have loaded, installed, or run AeroTone on a computer or similar device. If you install AeroTone onto a multi-user platform, server or network, each and every individual user of AeroTone must be licensed separately.

You may make one copy of AeroTone for backup purposes, providing you only have one copy installed on one computer being used by one person. Other users may not use your copy of AeroTone. The assignment, sublicense, networking, sale, or distribution of copies of AeroTone are strictly forbidden without the prior written consent of SoFly Limited. It is a violation of this agreement to assign, sell, share, loan, rent, lease, borrow, network or transfer the use of AeroTone. If any person other than yourself uses AeroTone registered in your name, regardless of whether it is at the same time or different times, then this agreement is being violated and you are responsible for that violation!

3.3 Copyright Restriction

This Software contains copyrighted material, trade secrets and other proprietary material. You shall not, and shall not attempt to, modify, reverse engineer, disassemble or decompile AeroTone. Nor can you create any derivative works or other works that are based upon or derived from AeroTone in whole or in part.

SoFly Limited's name, logo and graphics file that represents AeroTone shall not be used in any way to promote products developed with AeroTone. SoFly Limited retains sole and exclusive ownership of all right, title and interest in and to AeroTone and all Intellectual Property rights relating thereto.

Copyright law and international copyright treaty provisions protect all parts of AeroTone products and services. No program, code, part, image, audio sample, or text may be copied or used in any way by the user except as intended within the bounds of the single user program. All rights not expressly granted hereunder are reserved for SoFly Limited.

3.4 Limitation of Responsibility

You will indemnify, hold harmless, and defend SoFly Limited, its employees, agents and distributors against any and all claims, proceedings, demand and costs resulting from or in any way connected with your use of SoFly Limited's Software.

In no event (including, without limitation, in the event of negligence) will SoFly Limited, its employees, agents or distributors be liable for any consequential, incidental, indirect, special or punitive damages whatsoever (including, without limitation, damages for loss of profits, loss of use, business interruption, loss of information or data, or pecuniary loss), in connection with or arising out of or related to this Agreement, AeroTone or the use or inability to use AeroTone or the furnishing, performance or use of any other matters hereunder whether based upon contract, tort or any other theory including negligence.

SoFly Limited's entire liability, without exception, is limited to the customers' reimbursement of the purchase price of the Software (maximum being the lesser of the amount paid by you and the suggested retail price as listed by SoFly Limited) in exchange for the return of the product, all copies, registration papers and manuals, and all materials that constitute a transfer of license from the customer back to SoFly Limited.

3.5 Warranties

Except as expressly stated in writing, SoFly Limited makes no representation or warranties in respect of this Software and expressly excludes all other warranties, expressed or implied, oral or written, including, without limitation, any implied warranties of merchantable quality or fitness for a particular purpose.

3.6 Governing Law

This Agreement shall be governed by the law of the GB applicable therein. You hereby irrevocably attorn and submit to the non-exclusive jurisdiction of the courts of GB therefrom. If any provision shall be considered unlawful, void or otherwise unenforceable, then that provision shall be deemed severable from this License and not affect the validity and enforceability of any other provisions.

3.7 Termination

Any failure to comply with the terms and conditions of this Agreement will result in automatic and immediate termination of this license. Upon termination of this license granted herein for any reason, you agree to immediately cease use of AeroTone and destroy all copies of AeroTone supplied under this Agreement. The financial obligations incurred by you shall survive the expiration or termination of this license.

4. DISCLAIMER OF WARRANTY

THIS SOFTWARE AND THE ACCOMPANYING FILES ARE SOLD "AS IS" AND WITHOUT WARRANTIES AS TO PERFORMANCE OR MERCHANTABILITY OR ANY OTHER WARRANTIES WHETHER EXPRESSED OR IMPLIED. THIS DISCLAIMER CONCERNS ALL FILES GENERATED AND EDITED BY AeroTone AS WELL.

5. CONSENT OF USE OF DATA

You agree that SoFly Limited may collect and use information gathered in any manner as part of the product support services provided to you, if any, related to AeroTone. SoFly Limited may also use this information to provide notices to you which may be of use or interest to you. The software, nor installer, does NOT track any personal information. We use the information used during purchase. SoFly Ltd (Company Number: 1235215) is registered in England. Microsoft Flight Simulator and Microsoft are trademarks of Microsoft Corp.
